

# CONSTRUCTION SERVICE

Residential • Commercial • Industrial  
• Full Material Supply & Turnkey Execution

## About Our Construction

AVERIOR is a trusted engineering, construction, and project management company delivering end-to-end building solutions across Bangladesh. We specialize in residential, commercial, and industrial construction—supported by high-quality materials, skilled manpower, and professional engineering supervision.

Our mission is to deliver safe, durable, and cost-effective construction with transparency and technical excellence.

## Our Construction Services

### 1. Residential Building Construction

We build modern and sustainable homes with strong structural integrity and aesthetic excellence.

#### Services Include:

- Single homes, duplex & triplex
- Apartment buildings
- Foundations & structural work
- Plaster, tiles, sanitary, paint, and finishing
- Complete MEP installation
- Interior finishing packages

## 2. Commercial Building Construction

Professional construction for all types of commercial spaces.

### Services Include:

- Markets & shopping complexes
- Showrooms & retail spaces
- Office buildings
- Corporate floors
- Restaurants, banks & institutional buildings
- Fire safety & compliance construction

## 3. Industrial Construction

High-performance industrial building solutions built for durability and functionality.

### Included Services:

- Industrial sheds
- Steel structures
- Factories
- Warehouses
- Cold storage buildings
- Logistic hubs

## Complete Construction (Design + Build)

AVERIOR offers a full turnkey solution where we handle everything from planning to handover, including:

- Architectural design
- Structural design
- MEP design
- BOQ & estimation
- Procurement of materials
- Skilled labor deployment
- Full project management
- On-site supervision
- Quality control & testing
- Final finishing & handover

## Why Choose AVERIOR Construction?

- Complete engineering & construction solution
- Reliable supply of high-quality materials
- Professional architects & engineers
- Strict quality control
- Deadline-focused project delivery
- Transparent costing & reporting
- Skilled & trained labor force
- Safety-first construction
- Long-term maintenance support

## Our Construction Strengths

- Standard structural safety
- Earthquake-resistant design
- Durable materials & verified suppliers
- Smart project scheduling
- Zero-waste construction practice
- Modern construction equipment
- Energy-efficient & environment-friendly approach

## Project Management & Supervision

Every project is managed by a dedicated team:

- Project Manager
- Structural Engineer
- Civil Engineer
- Site Supervisor
- Quality Control Officer
- Safety Officer

We ensure continuous monitoring, weekly reporting, and client communication.
